

THE EPIDEMIC ABATING.

DECREASED ATTENDANCE AT THE SCHOOLS.

THE NUMBER OF DEATHS LAST WEEK THE LARGEST EVER REPORTED FOR A SINGLE WEEK IN WINTER.

The number of deaths reported at the Bureau of Vital Statistics during the twenty-four hours ending at noon yesterday was 176, or twenty-six less than on Friday. Dr. Roger S. Tracy, Registrar of Vital Statistics, said that the decrease in mortality probably indicated that the epidemic of influenza in the city had begun to abate. The history of the disease in Europe, he said, showed that an epidemic was self-limiting and usually lasted only about six weeks. An idea of the violence of the influenza in this city is given by the phenomenal number of deaths last week, which was 1,424, the largest number ever reported in a single week in cold weather. Dr. Tracy published the following table, showing the deaths from influenza and from those diseases which have been aggravated by the epidemic during last week and the previous week, compared with deaths from the same diseases during the week ending Jan. 1, 1889, which was an average week of last winter:

Table with 3 columns: Disease, 1889, 1890. Rows include Total deaths, Influenza, Pneumonia, Phthisis, Bronchitis, Heart disease, Kidney disease.

The deaths from influenza include all those which were certified to by physicians as having been caused by that disease complicated with other disorders. Dr. Tracy thinks that the epidemic has caused the death of many persons who were old and infirm, or who were suffering from chronic troubles, and that after the influenza passes away the mortality in the city will be comparatively low for months to come. The deaths from contagious diseases in the city during two weeks have not been more numerous than usual, judging by Dr. Cyrus Edson's report:

Table with 3 columns: Disease, 1889, 1890. Rows include Diphtheria, Scarlet fever, Typhoid fever, Typhus fever, Total.

Only one person who was suffering from typhus fever was removed to the Health Department's hospital on North Brother Island last week, a child who was taken sick in the Emigrant Hospital on Ward's Island. No deaths have occurred among the seven patients on North Brother Island, and all of the patients were said to be out of danger yesterday. The latest returns received by Superintendent Jasper yesterday in regard to the sickness in the schools during the week indicate a much greater decrease in attendance than was at first anticipated. More than 12 per cent of the teachers, it is now thought, have been absent during the week, against the usual average of 4 per cent. In some departments, where the absence among pupils is rarely greater than fifteen or twenty a day, a hundred or more have been away.

The cause is generally coughs, colds, and the influenza. Among the scholars there are not so many affected as among the teachers. In many instances the absence of pupils have been caused by the illness of their parents. In one school the children were absent owing to the deaths of their parents. Many of the teachers were due to deaths in their families.

Richard Mansfield had such a severe cold yesterday that it was thought unsafe for him to play the long and short part of Richard III. His throat had troubled him on Friday night, and yesterday afternoon he stayed away from Palmer's Theatre, and Mr. Harkins read the part of King Lear. The property manager, Mr. Harkins, is trying to see the performance or receiving their money back, and most of them chose to stay. Mr. Mansfield acted as usual in the evening, and it is not likely that he will have any further trouble.

Assistant Superintendent Hoffman, who was taken to Bellevue Hospital from the influenza last week, has recovered and has returned to his home. The only danger now apprehended by his physicians is pneumonia.

H. C. Duval, who was threatened with pneumonia as a result of an attack of "la grippe," is now recovering from the disease, but still suffers from bronchitis.

Stephen H. Atkins has suffered enough with the malady to be an expert on the subject. Dr. Edson says that he is the first to succumb to the disease, but he is not forgotten his sufferings by any means, and every one who has the disease has his sympathy.

John P. Fisher, who has a moderate amount of suffering, due to the fact that his recent transatlantic trip put him in a fine physical condition.

A. R. Whitely is still confined to his home with the disease, and will go to Florida to recover from the effects of it, as soon as he is able to travel.

Orville Lawrence, the well-known authority on politics and politicians, is just recovering from a terrific attack of the Russian disease. He looks as if he had been sick for a month.

Charles A. Hendon, of the Assembly, was also among the earliest victims of the disease. He says that it nearly took his life.

Bernard Higgin escaped with a few days' restlessness.

Dr. John F. Stevens, of Brooklyn, died yesterday from pneumonia, which had been developed from the influenza.

HIGH DEATH RATE PREVAILING. New-Haven, Conn., Jan. 11 (Special).—The number of deaths from "la grippe" during the last ten days is eighty-one. The cold weather has checked the disease to some extent.

Chicago, Jan. 11 (Special).—Influenza's deadly work goes steadily on. Last week the death rate was high, the number of deaths reaching the unusually large total of 476. This was an increase of thirty-five or forty upon the previous week. But for the week just finished, the increase will be greater than that of last week.

Trenton, N. J., Jan. 11.—The influenza is widespread here. The deaths for the month ending on Friday ending January 11 last, among the public health down with the disease are Campbell, O'Brien, Sullivan, and J. W. Ward. At the state prison many of the 1,000 convicts are affected, and it has been found necessary to shut down the work shops temporarily. The rule admitting visitors has been suspended.

ATTEMPTED SUICIDE UNDER AN AGREEMENT. Kansas City, Mo., Jan. 11.—A sensational sequel of the attempted suicide of Louis Kurth, of Atchison, Kan., a few days ago, has just come to light. Louis is sixteen years of age, and was nearly in love with Nellie Bernstein, age fourteen, the daughter of a railroad man of that city. Louis, however, had a rival, another boy of the same age. Both the youths were of that romantic turn of mind which is fostered by the reading of sensational literature, and they decided to settle their difficulties in the regulation style. To this end they drew a straws to see which was to have the girl, and decided that the one who drew the short straw was to draw himself within thirty days, and thus have a clear field for the successful suitor to the girl's favor. On December 6 the boys prepared the straws, and drew for life and death. Kurth's straw was the successful, and the girl at once transferred her affection to him. In January 9, Kurth fired the shot which was aimed at his heart, but which struck a rib, inflicting only a flesh wound. He stoutly asserts that he will keep his part of the agreement as soon as he is allowed his liberty, for he could never give his companions if he failed after proposing the judge.

JUDGE DENIS O'BRIEN GOES TO TAKE HIS SEAT. Albany, Jan. 11.—Judge O'Brien, of Watervort, the newly elected Judge of the Court of Appeals, will take his seat on Monday.

Have You Had The Grippe? It is the question of the day. If the influenza or any other disease or ailment, you should immediately take Hood's Sarsaparilla. It tones every part of the body, invigorates the liver, creates an appetite and thereby overcomes that fatal feeling.

THE EPIDEMIC ABATING.

"Puzzled The Doctors."

MOST OF THE CASES CURED BY AYER'S SARSAPARILLA.

Sarsaparilla has been given up by the regular practice. Physicians are recommending this medicine more than ever, and with satisfactory results. E. M. Sargent, Lowell, Mass., says: "Several years ago, my daughter, aged five, had large sores on her hands, face, and other parts of her body. The case puzzled the doctors. My daughter used Ayer's Sarsaparilla, and it resulted in a complete cure. Her blood must have been thoroughly purified, as she has never had so much as a pimple since taking this medicine."

"This is to certify that after having been sick for several weeks with kidney disease and general debility, and having been treated by several physicians without relief, I am now better in every respect. If the physicians would only try Ayer's Sarsaparilla, they would find it a most reliable medicine."—Maria Ludwigson, Albert Lea, Minn.

Ayer's Sarsaparilla,

PREPARED BY Dr. J. C. Ayer & Co., Lowell, Mass. Price 25¢ a bottle, \$1.00 a dozen.

not analogous. In that case the annual election of the company had been postponed by agreement, and he could not consent to it. It must oppose the election. If the applicants were to be elected, they would be in violation of the charter. The board of directors would not permit the holding of an election, but it might direct the election to be held in a certain way. Judge Wiley said that the board of directors would not permit the holding of an election, but it might direct the election to be held in a certain way. (For other related news, see page 4.)

TALES OF PET CATS.

SOME RESULTS OF EDUCATION.

HOW AN OFFENDED TOM BROADENED THE VIEWS OF A PRIVILEGED EXISTENCE.

"I should like to be no more for about the room at three," said a housewife the other day, "but that spoiled and petted cat of mine has been so bad that she will not let me do it. I don't want to say anything more."

"It's all matter of training," replied the visitor. "I could teach your cat in a week, a month, or a year, not to touch the bird. Let the cat come out in the room when you have time to watch it, and be sure the cat is well fed. If she makes a motion toward the bird, scold her severely. Don't have a mouse or a rat in the room. If she makes no motion to go, reward her with something nice. Next time she is in the room do the same thing and take the cat's eye in your hand and do the same thing. If she makes a motion toward the bird, scold her severely. Don't have a mouse or a rat in the room. If she makes no motion to go, reward her with something nice. Next time she is in the room do the same thing and take the cat's eye in your hand and do the same thing. If she makes a motion toward the bird, scold her severely. Don't have a mouse or a rat in the room. If she makes no motion to go, reward her with something nice. Next time she is in the room do the same thing and take the cat's eye in your hand and do the same thing. If she makes a motion toward the bird, scold her severely. Don't have a mouse or a rat in the room. If she makes no motion to go, reward her with something nice. Next time she is in the room do the same thing and take the cat's eye in your hand and do the same thing. If she makes a motion toward the bird, scold her severely. Don't have a mouse or a rat in the room. If she makes no motion to go, reward her with something nice. Next time she is in the room do the same thing and take the cat's eye in your hand and do the same thing. If she makes a motion toward the bird, scold her severely.
